

FAMILY MEDICINE

LECTURE SERIES

NOVEMBER 2022

FRIDAYS,
8:00-9:00 A.M. NST

LEARNING OBJECTIVES

Metabolic Fatty Liver Disease (MAFLD): Silent Epidemic

- Understand the spectrum of Metabolic Fatty Liver Disease (MAFLD).
- Recognize the associations between MAFLD and other diseases.
- Understand the utility and limitations of FibroScan.

New Developments in Cervical Cancer Screening and Prevention

- List the pros and cons of cytology versus primary HPV testing or cervical cancer screening.
- State the efficacy of HPV vaccination before and after sexual debut in both males and females.
- Outline the impact on the health system, primary care providers, and participants, resulting from a change from cytology to primary HPV screening for cervical cancer.

Approaches to the Management of Chronic Non Cancer Pain

- Discuss approaches to comprehensive pain management assessment and treatment.
- Recognize the role of self-management in the framework of chronic pain management while optimizing pharmacological and interventional options tailored to individual patients.
