

FAMILY PRACTICE RENEWAL PROGRAM

DATES: JAN 10 & 17, 2024 CHRONIC PAIN MANAGEMENT

Chronic Pain Management will be offered as part of a 2-session series. To receive CPD credits you must attend both.
[When you register you are automatically registered for both sessions.](#)

LEARNING OBJECTIVES

CHRONIC PAIN MANAGEMENT

1. Discuss approaches to comprehensive pain management assessment and treatment.
2. Define chronic pain and understand the concept of chronic pain as a disease in itself rather than simply a symptom.
3. Recognize the role of self-management in the framework of chronic pain management while optimizing pharmacologic and interventional options tailored to individual patients.
4. Determine the most appropriate treatment plan for a patient in pain using pharmacological non-opioid and procedural approaches, including preventive interventions.
5. Describe and interpret the recommendations pertaining to optimization of non-opioid and opioid therapy in the 2017 Canadian guideline for opioids for chronic non-cancer pain.
6. Identify biological and psychosocial processes involved in the development of chronic pain.
7. Assess patients suffering from pain, develop a formulation regarding the factors contributing to pain, and identify its influence on the patient's life.

APPROACH TO OUD/SUD

1. Recognize options for treatment of OUD.
 - A. Pharmacological
 - B. Non-pharmacological
2. Select from a repertoire of treatment options to initiate treatment or refer for treatment initiation.
3. Identify available harm reduction resources.

RECOGNIZING SUD IN PRIMARY CARE

1. Recognize the unique opportunity for identifying SUD in primary care.
2. Identify screening options for SUDs.
3. Integrate brief intervention therapy.
4. Recognize when to integrate specialized substance use resources.
5. Understand the ongoing role of primary care.

To optimize your learning, program registration requires completion of a pre-test, for your use only. Pre-test results are anonymous.
