

FAMILY MEDICINE

LECTURE SERIES

MAY 2024

FRIDAYS,
8:00-9:00 A.M NST

LEARNING OBJECTIVES

Pharmacological management of MNCD and BPSD

- Provide overview of Mild Cognitive Impairment (MCI) and Major Neurocognitive disorder (MNCD)
- Review indications and evidence for pharmacologic treatment of MCI and MNCD
- Explain the side effects and contraindications for pharmacotherapy in MNCD
- Review Behavioural and Psychological Symptoms of Dementia (BPSD) and explore the instances where pharmacotherapy can be effective
- Explain non-pharm strategies for BPSD
- Detail the recommended pharmacotherapy for BPSD along with cautions and side effects of medications

Improved EMR functionality

- Describe the functions and benefits of the electronic WHSCC form.
- Enhance the management of Type 2 Diabetes Mellitus (T2DM) by effectively utilizing the mini T2DM template along with the embedded clinical guidelines.
- Increase the effectiveness of routine screening for patients by implementing targeted health goals

Transgender Health in Primary Care

- Acquire increased general knowledge of 2SLGBTQ2IA+ communities and gender diversity
- Gain increased understanding and competency regarding inclusive language
- Enhance your skills in creating and maintaining an inclusive clinical environment
- Identify and utilize relevant, evidence-based resources and community support

Updates Regarding Prenatal Screening in Newfoundland and Labrador

- Describe the range of prenatal screening methods, such as maternal serum screening and non-invasive prenatal screening (NIPT).
- Explore the updated guidelines for NIPT coverage (available to all primary care providers).
- Discuss the role of genetic counseling in prenatal screening.
- Examine the various outcomes of prenatal screenings.
- Discuss the strategies for coordinating follow-up care for patients with positive or inconclusive screening results.
