

FAMILY MEDICINE

LECTURE SERIES

NOVEMBER 2024

FRIDAYS,
8:00-9:00 A.M NST

LEARNING OBJECTIVES

Syphilis: Who to Test and How to Treat

- Explain the role of the Thoracic Triage Panel in the work up of Lung Cancer Patients
- Outline the local, national and international research supporting the need for Lung Screening
- Describe the Provincial Lung Screening Pilot Program and its integration with the Thoracic Triage Panel

Common Dermatological Issues in Primary Care

- Describe the differential and management options for alopecia areata
- Describe the diagnosis and management options for pattern hair loss
- Discuss the differential, identification, approach to management for scarring hair disorders

A Family Doctor's Practical Approach to Patients with Memory Concerns

- Develop effective techniques for distinguishing between Mild Cognitive Impairment, Delirium, and Mild Dementia in a Family Medicine Clinic
- Identify when to start a trial of a cholinesterase inhibitor
- Identify ways to support patients diagnosed with dementia, and their caregivers, from a primary care lens

The Complexities and Imperfections of Triage

- Explore the origins and development of the triage
- Gain insight into the various stages and procedures involved in modern triage practices
- Comprehend the Canadian triage acuity scoring system
- Recognize triage as a dynamic and ongoing process in patient care
- Learn how Primary Care Providers (PCPs) can contribute to accurate and effective triage decision-making
